About

Frontend / Mobile developer with a product-focused approach. I build web apps with React and TypeScript and ship them as native Android apps via Capacitor — from Telegram WebApps to enterprise systems with Google Play releases. Actively use AI tools to speed up development.

Skills

- Frontend:** React, TypeScript, Next.js, Tailwind CSS, Vite, Radix UI, Motion, React Hook Form, TanStack Query
- Backend:** NestJS, Node.js, PostgreSQL, Redis, Drizzle ORM
- Tools:** Capacitor, Telegram Bot API, Firebase FCM, Chrome Extensions API, n8n, Git
- Infrastructure:** Docker, Docker Compose, Nginx, GitHub Actions

Experience

Frontend / Mobile Developer — Loov 2025-06 — Present

- Telegram WebApp and admin panels on React + TypeScript
- PWA → Android conversion via Capacitor + Google Play release
- FSD-based frontend architecture
- External API integration through BFF pattern (NestJS)
- Chrome extension for Itigris CRM (Manifest V3)
- No-code automations on n8n

Projects

Loov Care React PWA Web Push

Web system for optical services management: client-facing PWA + Telegram WebApp + bot + admin panel with notification management

Staff Focus React Vite TypeScript

PWA + Android for employees: KPI, tasks, motivation, WebAuthn biometrics, push, drag-n-drop dashboard, deep Frappe ERP integration

Jarvis

React

Webpack

Chrome Extension Manifest V3

Chrome extension enhancing Itigris CRM capabilities

Rachel

n8n

Telegram Bot API

IMAP / Email

Email → Telegram: a bot forwards messages from a shared inbox to the right person in Telegram
